Definition

• What is a LaTeX?

A mathemetics typesetting program that is the standard for most professional mathematics writing. This is based on typesetting program TEX created by Donald Knuth of Stanford Uniuversity. Leslie Lamport was responsible for create LaTeX a more user friendly version of TEX. A team of LaTeX programmers created the current version LaTeX 2ϵ.

Purpose

• Why use LaTeX?

In properly typeset mathematics variables appear in italics (e.g., $f(x) = x^2 + 2x - 3$). The exception to this rule is predefined functions (e.g.$\sin(x)$). It is important to always threat text, variables, and functions correctly. There are two ways to present mathematical expression inline or equation.

Usages

• Math vs. text vs. function

- Inline

Inline expressions occur in the middle of a sentence. To produce an inline expression, place the math expression between dollar signs ($). For example, typing **90°** is the same as **$\frac{\pi}{2}$ radians** yields 90° is the same as $\frac{\pi}{2}$

- Equation

Equations are mathmetical expressions that are given their own line and are centered on the page. These are usually used for important equations that deserve to be showcased on their own line of for large equations that cannot fit inline. To produce an inline expression, place the mathematical expression between the symbols \[and \]. Typing **\[x=\frac{-b\pm\sqrt{b^2-4ac}}{2a}\]** yields

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}.$$

- Displaystyle

To get full-sized inline mathematical expressions use **\displaystyle**. Use this sparingly. Typing **I want this $\displaystyle \sum_{n=1}^{\infty}\frac{1}{n}$, not this $\sum_{n=1}^{\infty}\frac{1}{n}$**. yields

I want this $\displaystyle \sum_{n=1}^{\infty} \frac{1}{n}$, not this $\sum_{n=1}^{\infty} \frac{1}{n}$

• Images

You can put images (pdf, png, jpe, or gif) in your document. They need to be in the same location as your .tex file when you compile the document. Omit [**width=.5in**] if you want the image to be full-sized.

\begin{figure}[**ht**]

\includegraphics[**width=.5in**]**{imagename.jpg}**

\caption{The (optional) caption goes here.}

\end{figure}

• Text decorations

Your text can be *italics* (\textit{italics}), **boldface** (\textbf{boldface}), underline (\underline{underline}),or `typewriter` (\texttt{typewriter}).

Your math can contain boldface, $\mathbf{R}$ (\mathbf{R}), or blackboard bold, $\mathbb{R}$ (\mathbb{R}). You may want to used these to express the sets of real numbers ($\mathbb{R}$ or $\mathbf{R}$), integers ($\mathbb{Z}$ or $\mathbf{Z}$), rational numbers ($\mathbb{Q}$ or $\mathbf{Q}$), and natural numbers ($\mathbb{N}$ or $\mathbf{N}$).

To have text appear in a math expression use **\text{text}**.

(0,1]={x\in\mathbb{R}:x>0\text{ and }x\le 1} yields

$(0,1] = \{x \in \mathbb{R} : x > 0 \text{ and } x \le 1\}$. (Without the **\text** command it treats "and" as three variables: $(0,1] = \{x \in \mathbb{R} : x > 0 and y \le 1\}$)

• Spaces and new lines

LaTeX ignores extra spaces and new lines. For example,

This sentence will look fine after it is compiled

This sentence will look fine after it is compiled. Leave one full empty line between two paragraphs. Place \\ at the end of a line to create a new line (but not create a new paragraph).

This
compiles

like
this.
This compiles
like
this.
Use **\noindent** to prevent a paragraph from indenting.

• Comments

Use **%** to create a comment. Nothing on the line after the % will be typeset. **$f(x)=\sin(x)$ %this is the sine function** yields $f(x) = \sin(x)$

• Delimiters

description command output
parentheses (x) (x)
brackets [x] [x]
curly braces \{x\} {x}
To make your delimiters large enough to fit the content, use them together with **\right** and **\left**. For example, **\left\{\sin\left(\frac**
\right\}_{n}^{\infty} produces

$\left\{\sin\left(\frac{1}{n}\right)\right\}_n^{\infty}$, differ to $\{\sin(\frac{1}{n})\}_n^{\infty}$.

Currly braces are non-priting characters that are used to gather text that has more than one character. Observe the differences between the four expressions **x^2, x^{2}, x^2t, x^{2t}** when typeset: x^2, x^2, x^2t, x^{2t}

• Lists

You can produce ordered and unordered lists.

description	*command*	*output*
	\begin{itemsize}	
	\item	
unordered list	Thing 1	• Thing 1
	\item	• Thing 2
	Thing 2	
	\end{itemsize}	
	\begin{enumerate}	
	\item	
ordered list	Thing 1	• Thing 1
	\item	• Thing 2
	Thing 2	
	\end{enumerate}	

• Symbols (in *math* mode)

- The basics

description	*command*	*output*
addition	+	+
subtraction	-	−
plus or minus	\pm	±
multiplication (times)	\times	×
multiplication (dot)	\cdot	·
division symbol	\div	÷
division (slash)	/	/
circle plus	\oplus	⊕
circle times	\otimes	⊗
equal	=	=
not equal	\ne	≠
less than	<	<
greater than	>	>
less than or equal to	\le	≤
greater than or equal to	\ge	≥
approximately equal to	\approx	≈
infinity	\infty	∞
dots	1,2,3,\ldots	$1, 2, 3, \ldots$
dots	1+2+3+\cdots	$1 + 2 + 3 + \cdots$
fraction	\frac{a}{b}	$\frac{a}{b}$
square root	\sqrt{x}	$\sqrt{x}$
nth root	\sqrt[n]{x}	$\sqrt[n]{x}$
exponentiation	a^b	a^b
subscript	a_b	a_b
absolute value	|x|	$\|x\|$
natural log	\ln(x)	$\ln(x)$
logarithm	\log_{a}b	$\log_a b$
exponential function	e^x=\exp(x)	$e^x = \exp(x)$
degree	\deg(f)	$\deg(f)$

- Functions

description	*command*	*output*
maps to	\to	→
composition	\circ	∘
piecewise function	|x|= \begin{cases} x & x\ge 0\\ -x & x<0 \end{cases}	$\|x\| = \begin{cases} x & x \ge 0 \\ -x & x < 0 \end{cases}$

- Greek and Hebrew letters

description	*output*	*command*	*output*
\alpha	α	**\tau**	τ
\beta	β	**\theta**	θ
\chi	χ	**\upsilon**	υ
\delta	δ	**\xi**	ξ
\epsilon	ϵ	**\zeta**	ζ
\varepsilon	ε	**\Delta**	Δ
\eta	η	**\Gamma**	Γ
\gamma	γ	**\Lambda**	Λ
\iota	ι	**\Omega**	Ω
\kappa	κ	**\Phi**	Φ
\lambda	λ	**\Pi**	Π
\mu	μ	**\Psi**	Ψ
\nu	ν	**\Sigma**	Σ
\omega	ω	**\Theta**	Θ
\phi	ϕ	**\Upsilon**	Υ
\varphi	φ	**\Xi**	Ξ
\pi	π	**\aleph**	$\aleph$
\psi	ψ	**\beth**	$\beth$
\rho	ρ	**\daleth**	$\daleth$
\sigma	σ	**\gimel**	$\gimel$

- Set theory

description	*command*	*output*
set brackets	**\{1,2,3}**	$1, 2, 3$
element of	**\in**	$\in$
not an element of	**\not\in**	$\notin$
subset of	**\subset**	$\subset$
subset of	**\subseteq**	$\subseteq$
not a subset of	**\not\subset**	$\not\subset$
contains	**\supset**	$\supset$
contains	**\supseteq**	$\supseteq$
union	**\cup**	$\cup$
intersection	**\cap**	$\cap$
big union	**\bigcup_{n=1}^{10}A_n**	$\bigcup_{n=1}^{10} A_n$
big intersection	**\bigcap_{n=1}^{10}A_n**	$\bigcap_{n=1}^{10} A_n$
empty set	**\emptyset**	$\emptyset$
power set	**\mathcal{P}**	$\mathcal{P}$
minimum	**\min**	$\min$
maximum	**\max**	$\max$
supremum	**\sup**	$\sup$
infimum	**\inf**	$\inf$
limit superior	**\limsup**	$\limsup$
limit inferior	**\liminf**	$\liminf$
closure	**\overlineA**	$\overline{A}$

- Calculus

description	*command*	*output*
derivative	**\frac{df}{dx}**	$\frac{df}{dx}$
derivative	**f'**	f'
partial derivative	**\frac{\partial f}{\partial x}**	$\frac{\partial f}{\partial x}$
integral	**\int**	$\int$
double integral	**\iint**	$\iint$
triple integral	**\iiint**	$\iiint$
limits	**\lim_{x\to \infty}**	$\lim_{x \to \infty}$
summation	**\sum_{n=1}^{\infty}a_n**	$\sum_{n=1}^{\infty} a_n$
product	**\prod_{n=1}^{\infty}a_n**	$\prod_{n=1}^{\infty} a_n$

- Logic

description	*command*	*output*
not	**\neg**	$\neg$
and	**\land**	$\land$
or	**\lor**	$\lor$
if...then	**\implies**	$\implies$
if and only if	**\iff**	$\iff$
logical equivalence	**\equiv**	$\equiv$
therefore	**\therefore**	$\therefore$
there exists	**\exists**	$\exists$
for all	**\forall**	$\forall$

- Linear algebra

description	*command*	*output*
vector	**\vec{v}**	$\vec{v}$
vector	**\mathbf{v}**	$\mathbf{v}$
norm	**||\vec{v}||**	$\|\|\vec{v}\|\|$
matrix	**\left[** **\begin{array}{ccc}** **1 & 2 & 3 ** **4 & 5 & 6 ** **7 & 8 & 0** **\end{array}** **\right]**	$\left[\begin{array}{ccc} 1 & 2 & 3 \\ 4 & 5 & 6 \\ 7 & 8 & 0 \end{array}\right]$
determinant	**\left|** **\begin{array}{ccc}** **1 & 2 & 3 ** **4 & 5 & 6 ** **7 & 8 & 0** **\end{array}** **\right|**	$\left\|\begin{array}{ccc} 1 & 2 & 3 \\ 4 & 5 & 6 \\ 7 & 8 & 0 \end{array}\right\|$
determinant	**\det(A)**	$\det(A)$
trace	**\operatorname{tr}(A)**	$\operatorname{tr}(A)$
dimension	**\dim(V)**	$\dim(V)$

- Number theory

description	*command*	*output*
devides	**|**	$\|$
does not devide	**\not|**	$\nmid$
div	**\dv**	$\div$
mod	**\mod**	$\mod$
greatest common divisor	**\gcd**	$\gcd$
ceiling	**\lceil x \rceil**	$\lceil x \rceil$
floor	**\lfloor x \rfloor**	$\lfloor x \rfloor$

- Geometry and trigonometry

description	*command*	*output*
angle	**\angle ABC**	$\angle ABC$
degree	**90^{\circ}**	90°
triangle	**\triangle ABC**	$\triangle ABC$
segment	**\overline{AB}**	$\overline{AB}$
sine	**\sin**	$\sin$
cosine	**\cos**	$\cos$
tangent	**\tan**	$\tan$
cotangent	**\cot**	$\cot$
secant	**\sec**	$\sec$
cosecant	**\csc**	$\csc$
inverse sine	**\arcsin**	$\arcsin$
inverse cosine	**\arccos**	$\arccos$
inverse tangent	**\arctan**	$\arctan$

- Symbols (in *text* mode)

The following symbols do **not** have to be surrounded by dollar signs

description	*command*	*output*
dollar sign	**\$**	$
percent	**\%**	%
ampersand	**\&**	&
pound	**\#**	#
backslash	**\textbackslash**	\
left quote marks	**` `**	“
right quote marks	**' '**	”
single left quote	**`**	‘
single right quote	**'**	’
hyphen	**X-ray**	X-ray
en-dash	**pp. 5- -15**	pp. 5–15
em-dash	**Yes- - -or no?**	Yes—or no?
